Three complete novels in the Sam Reilly Action and Adventure series!

Rogue Wave

The offer – \$20 billion split between four leading scientists on alternative energies to purchase and then squash their research lines, which include the recent discovery of a powerful new energy source capable of replacing mankind's reliance on fossil fuels.

There's no doubt their discovery is worth ten times that much. But will any one of them live if they refuse?

At the same time, the greatest technological advancement in warfare since the creation of the Atomic bomb has been discovered, and is being offered to the highest bidder.

There is just one problem though; the seller might no longer have any control of the weapon.

Can Sam Reilly weave his way through the web of industrial and political espionage before the human race loses its greatest fight for survival?

The Cassidy Project

In the middle of the Pacific Ocean in 1962, at the height of the cold war, the U.S. military experimented with electromagnetic pulses created by detonating high atmosphere nuclear bombs. The project was code named Starfish Prime. The primary objective was to develop the ability to produce an EMP with enough force to knock out an entire nation's communications, rendering a retaliatory attack impossible.

The secondary objective, along with its consequences, was deemed too important to national security to ever be released.

In 1983 an American B52 Nuclear Bomber goes missing somewhere near the Bering Strait while delivering a secret cargo at the express order of President Ronald Reagan to an unmapped island. Present day, in the Weddell Sea off the coast of Antarctica, a woman wakes up on a cruise ship to discover she's the only person left aboard, despite no apparent fault with the ship.

Sam Reilly, already on a rescue mission to Antarctica to save five French scientists, may be the only person standing in the way of the completion of The Cassidy Project.

The Nostradamus Equation

In 1562, Michel de Nostradamus led a small party on an expedition deep into the hostile Desert of Barbary, now known as the Sahara. Without any knowledge of what they might find, the small party had entered the vast desert in search of a miracle.

In the present day, Dr. Zara Delacroix enlists the help of Sam Reilly to hunt for answers about a book she believes was buried in the Sahara centuries earlier to protect humanity from some great catastrophe.

This ancient manuscript was named The Book of Nostradamus. . .
